

TECHNOLOGY TRENDS & DEMOGRAPHIC DIVERSITY IN TECHNOLOGY

Hai Nguyen

September 4, 2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Current demand in technology
- Technology Trends:
 - ✓ Programming language Trends
 - ✓ Database Trends
 - ✓ Platform Trends
 - ✓ Webframe Trends
- Demographic surveys to analyze the technology gaps in countries, by gender, by ages, and educational level

INTRODUCTION

Content About:

- Analyze data to help identify the current demands and trends in technologies for future to keep pace with changing technologies and remain competitive

Purpose:

- Identify the top programming languages in demand
- Identify the top database skills in demand
- Identify skill requirements in technology in the future
- Demographic factors impact to the technology workforce

Report to:

- Human Resource team and IT Manager

METHODOLOGY

Data Sources:

- ✓ Job postings
- ✓ Training portals
- ✓ Surveys

▪ **Data Collection:**

- ✓ Collecting data using APIs
- ✓ Collecting data using Webscraping

▪ **Data Exploration**

▪ **Data Wrangling**

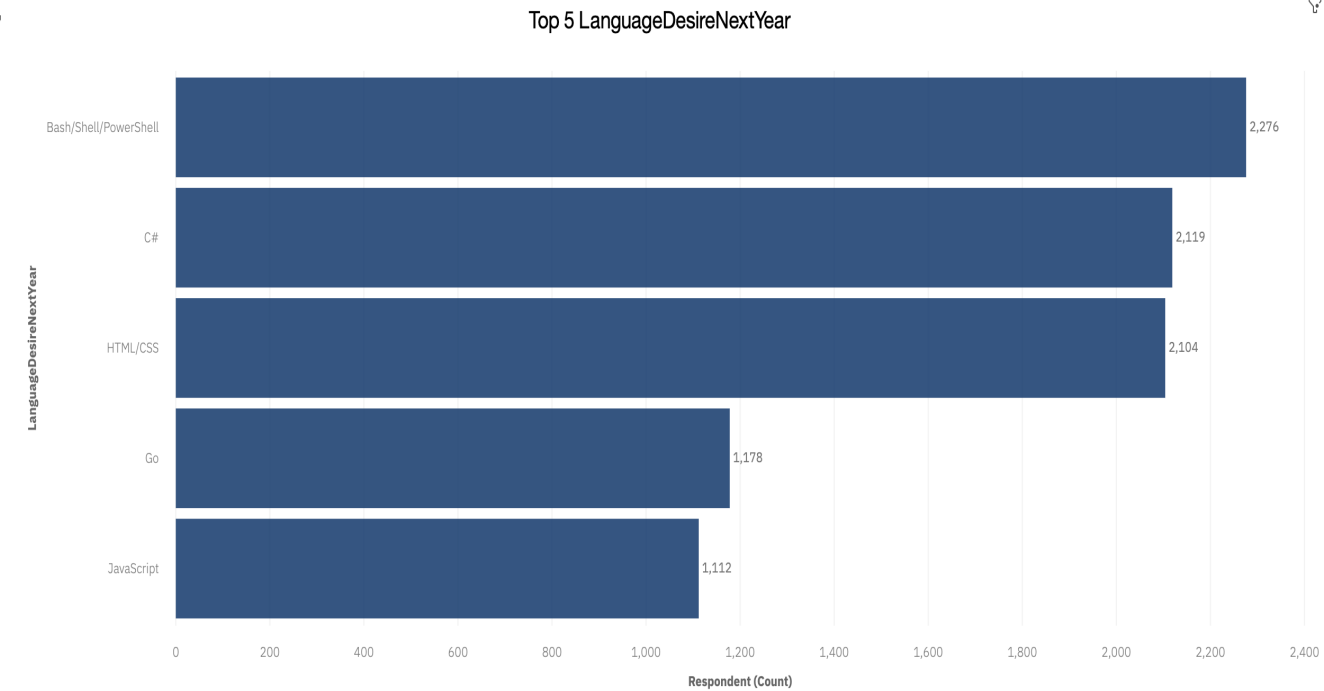

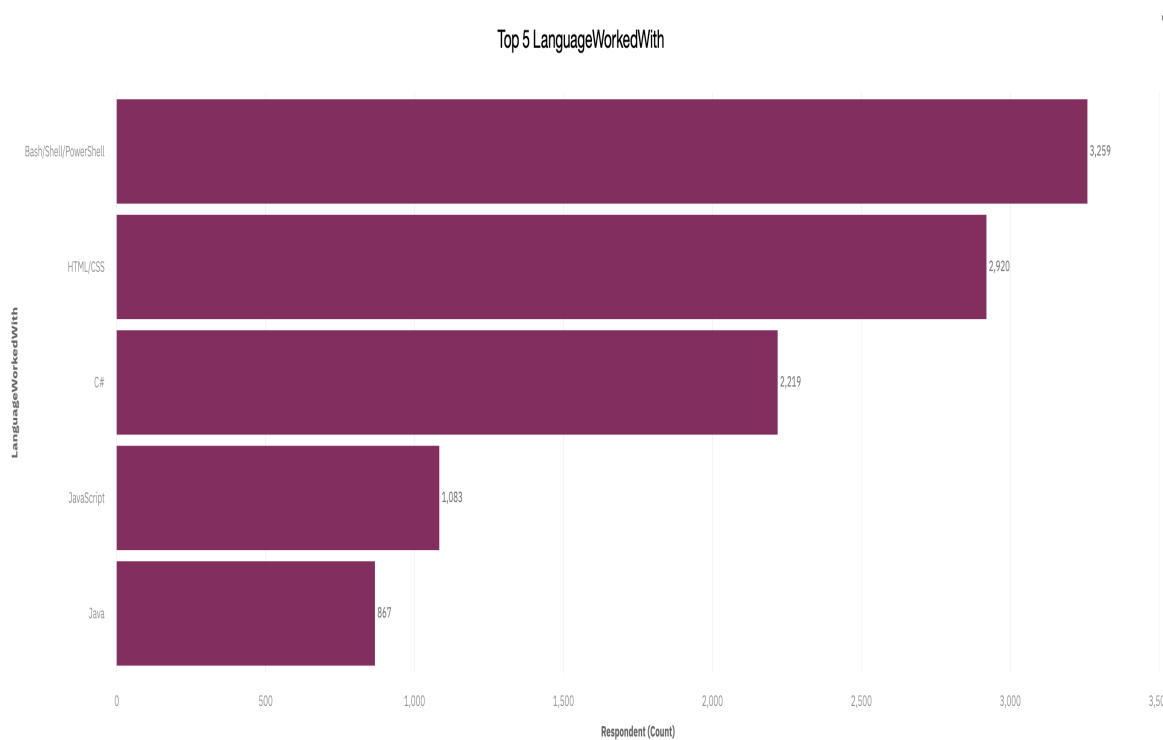

▪ **Data Visualization and Dashboard Creation**

▪ **Finding Presentation**

RESULTS

PROGRAMMING LANGUAGE TRENDS

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- PowerShell, HTML/CSS and C# are the top 3 programming languages to be used this year
- PowerShell, HTML/CSS and C# continues to be desired languages next year

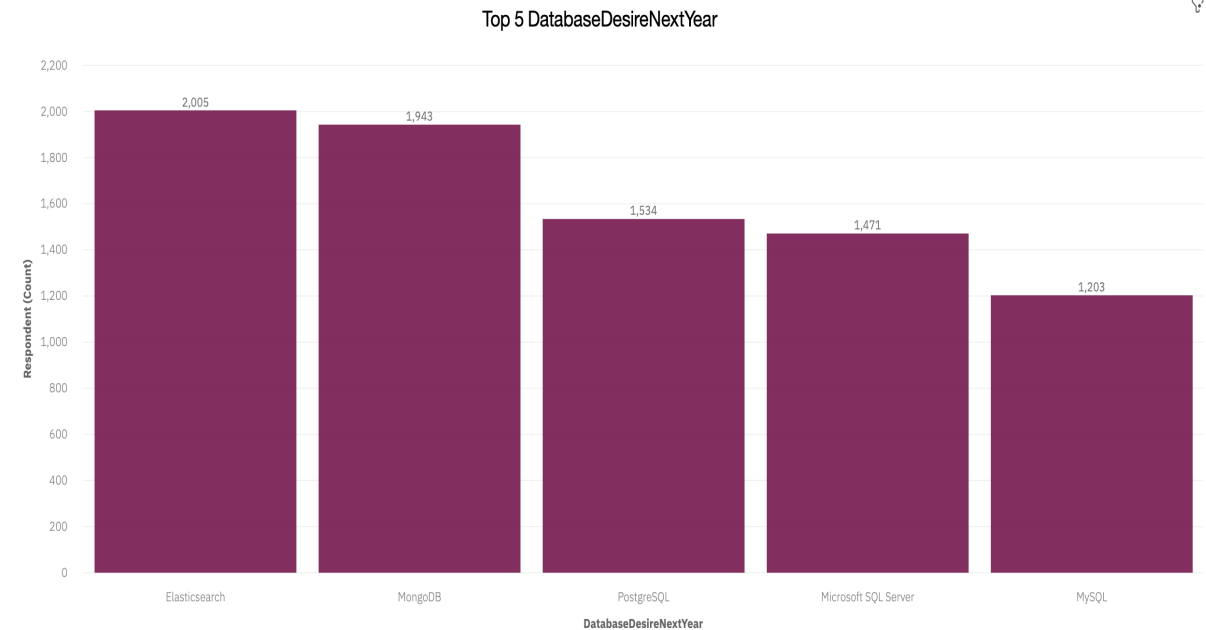

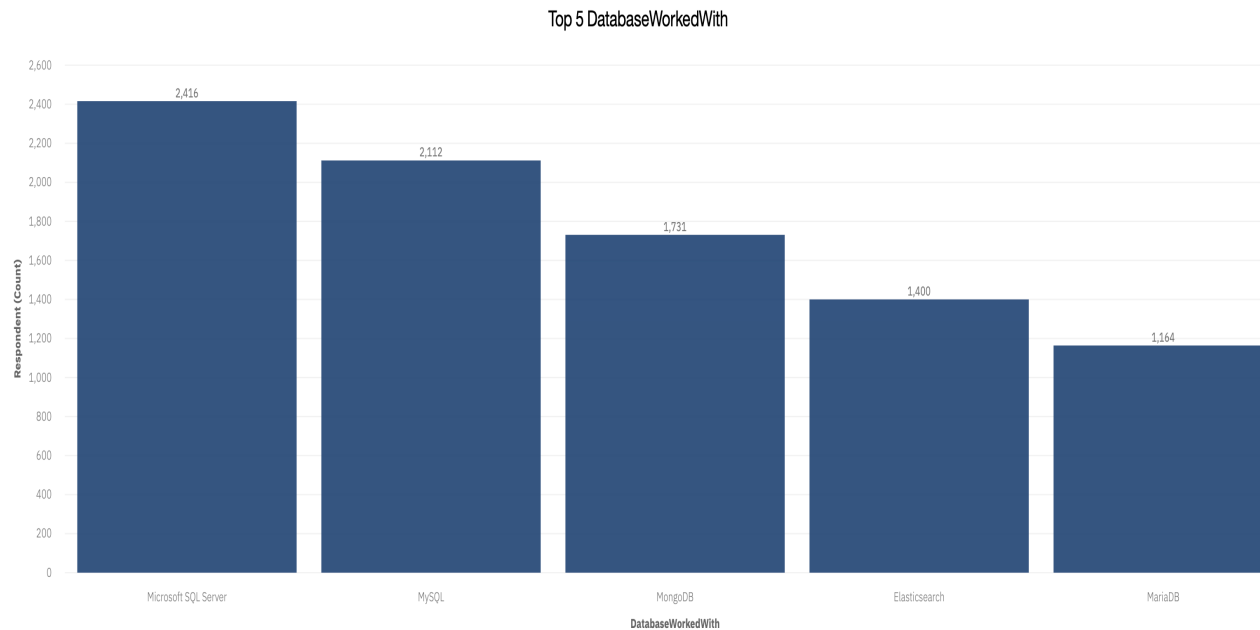

Implications

- Web development is still high demand for future

DATABASE TRENDS

Top 5 databases for the current year

Top 5 databases for next year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

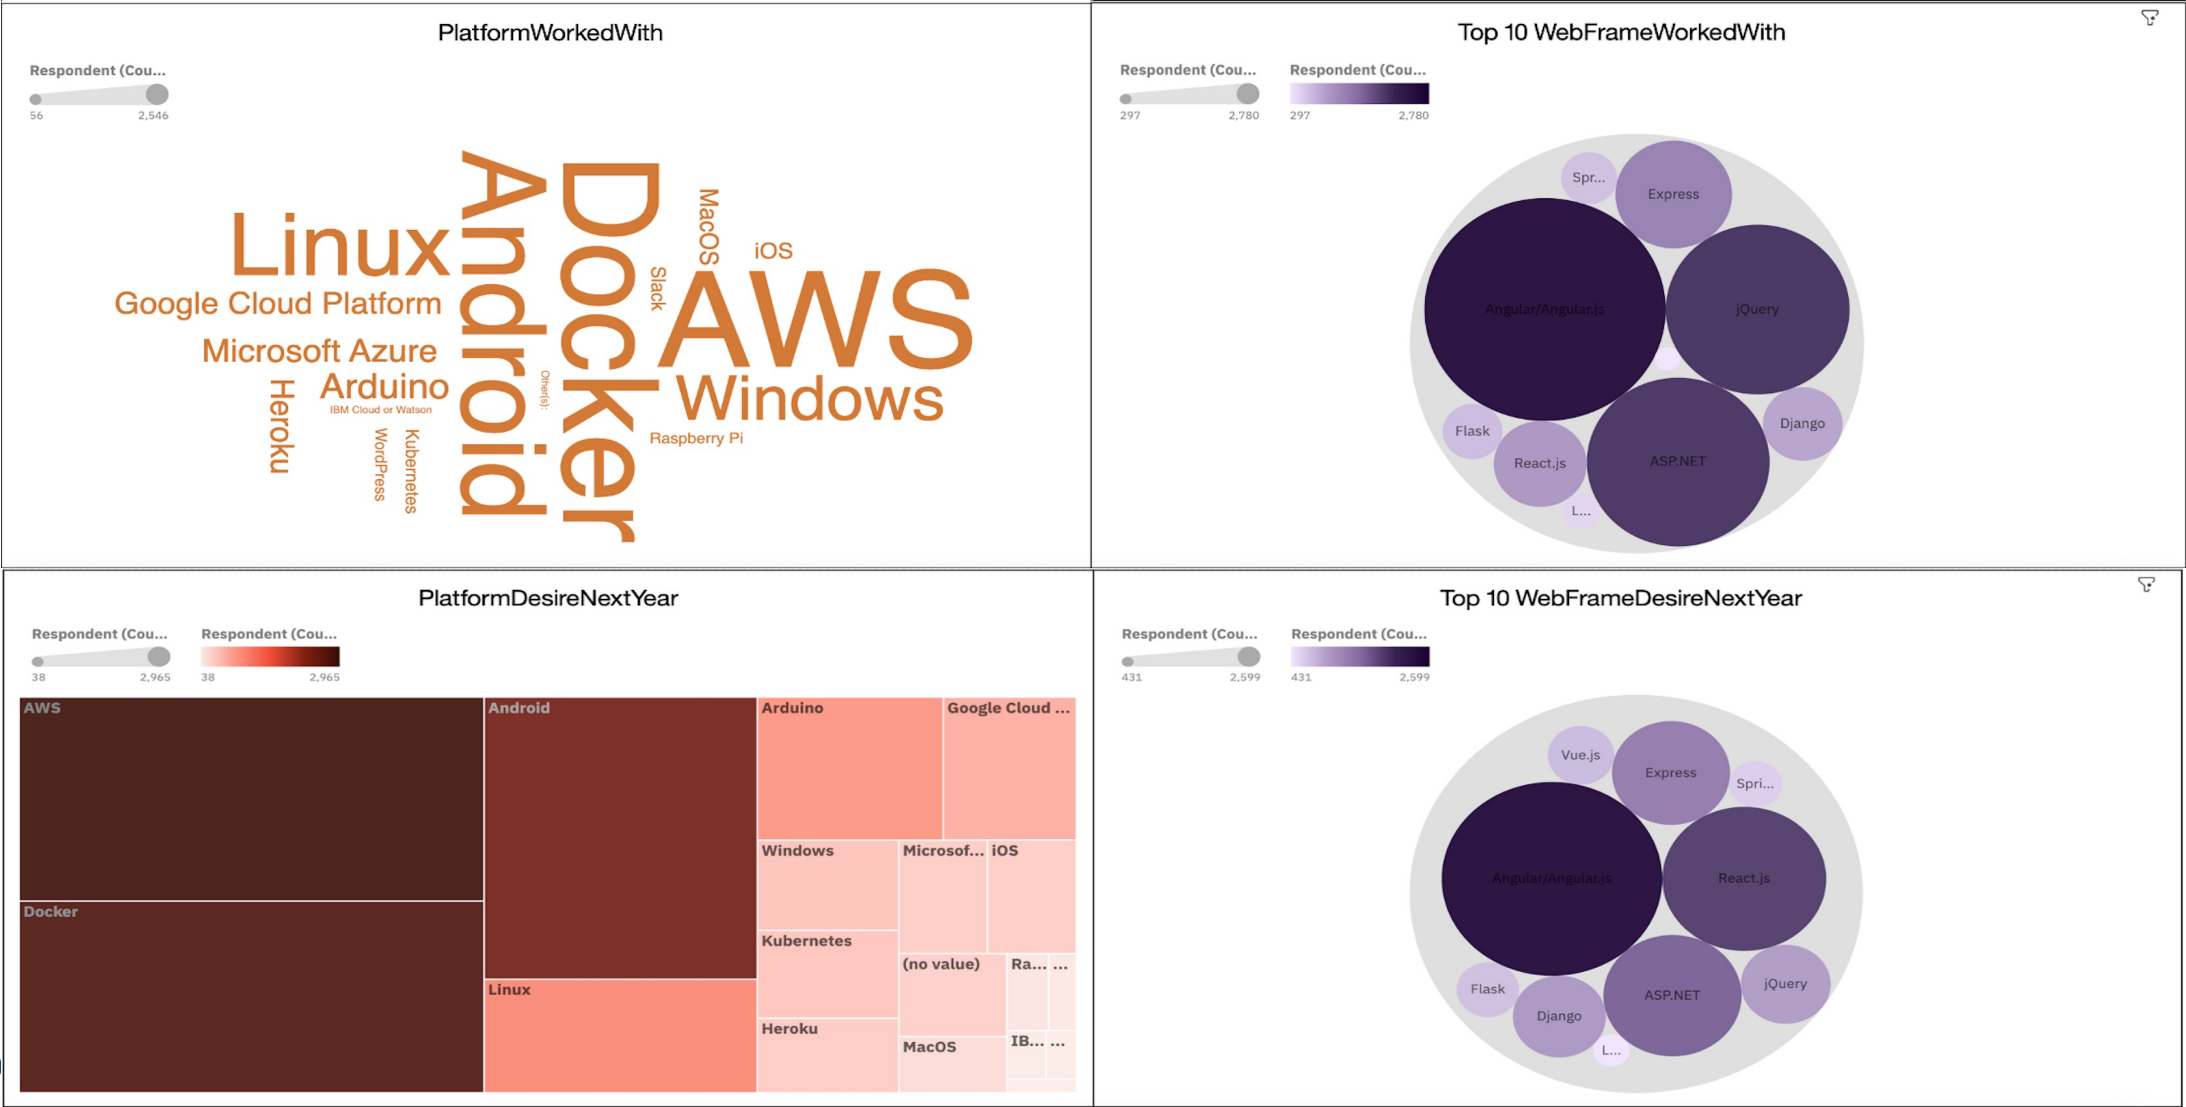

Findings

- MicrosoftSQLServer is the most popular
- Following by MySQL and MongoDB
- Elasticsearch and MongoDB will be upcoming favorites

Implications

- Open - source databases are still preferable in companies
- NoSQL database will make an impact for storing non relational data
- Because of the rise of Cloud computing and Microservices Implication, Elasticsearch is gaining significant interest.

PLATFORM AND WEBFRAME TRENDS

PLATFORM AND WEBFRAME TRENDS - FINDINGS & IMPLICATIONS

Findings

- AWS, Docker and Android are the top 3 of popularity
- Platforms AWS and Docker continue to grow next year
- Angular, ASP.Net, jQuery are the most popular web-development frameworks at present
- In future, Angular is still the top 1, following by React.js and ASP.Net

Implications

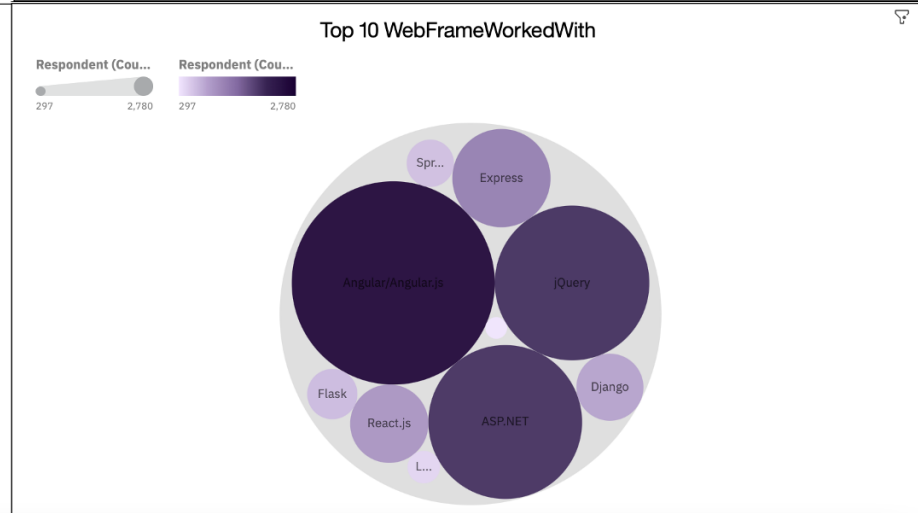

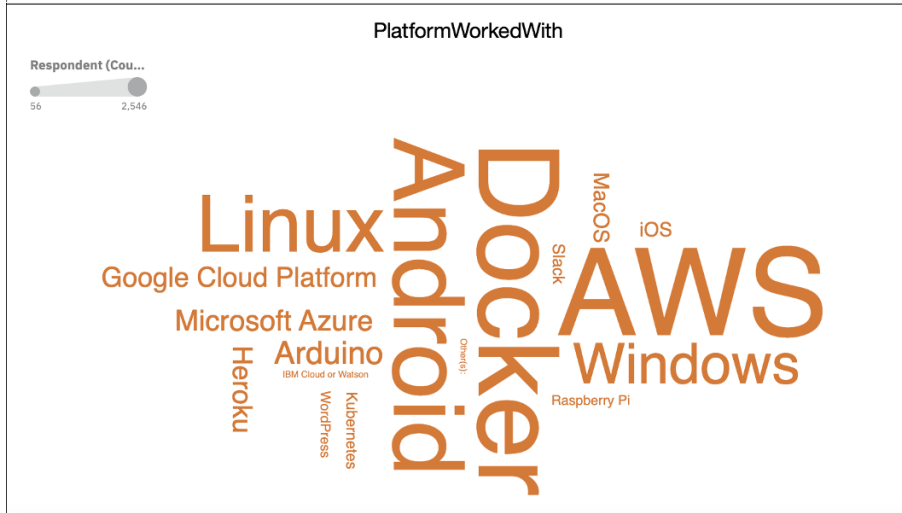

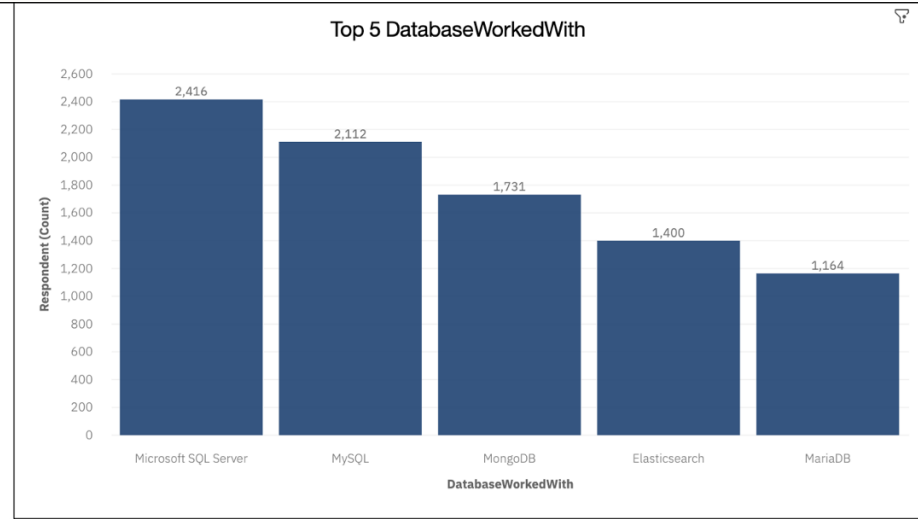

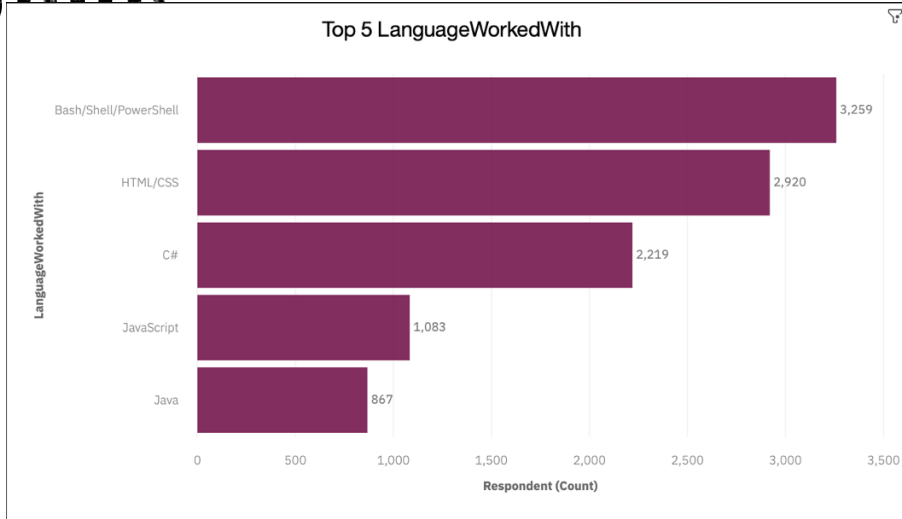

- Containerization technologies and cloud service are the most interested in.
- Front-end Frameworks are popular for Web Development
- Webframes with features of easy adaption, strong community support , flexibility, fast loading are preferable.

DASHBOARD

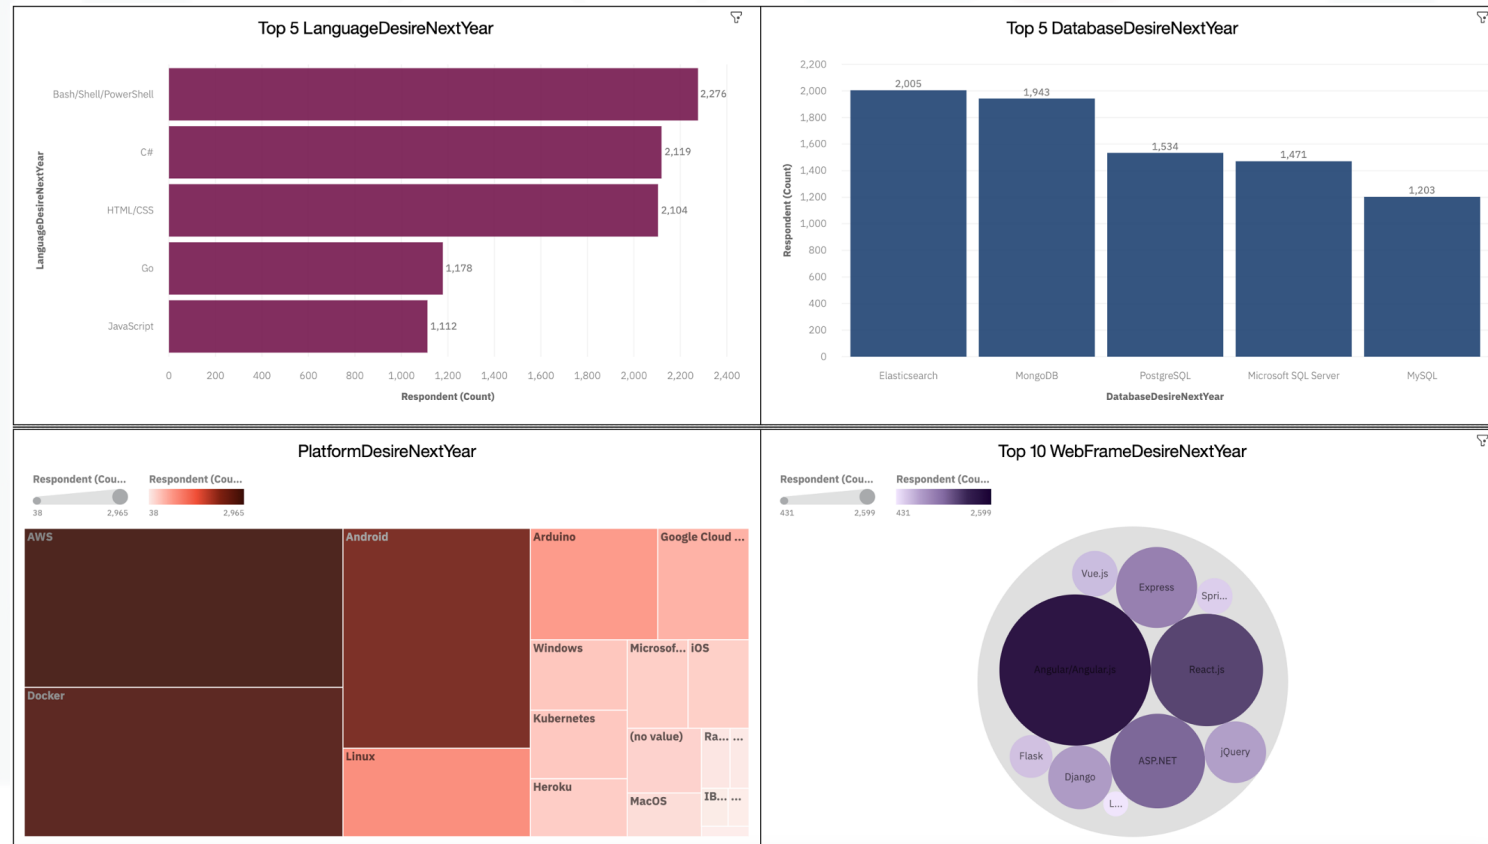

For more detail: [Cognos Dashboard](#)

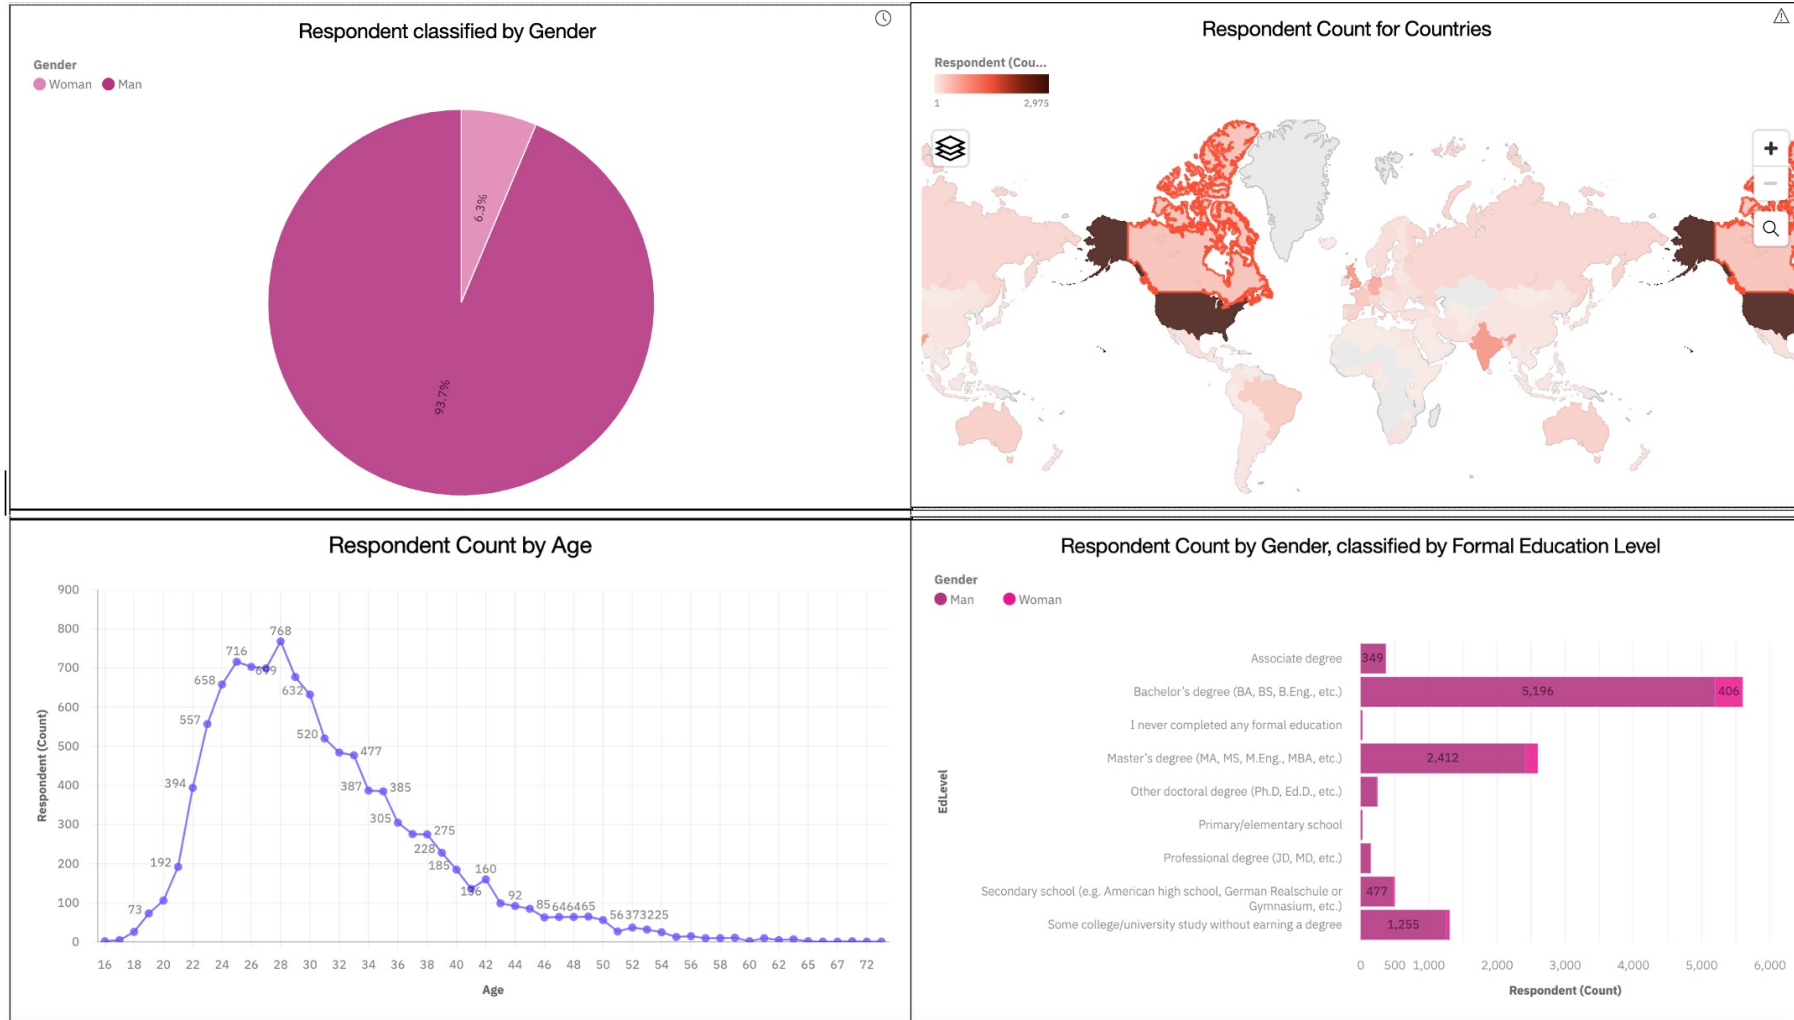

DASHBOARD TAB 1 - CURRENT TECHNOLOGY USAGE

DASHBOARD TAB 2 - FUTURE TECHNOLOGY TREND

DASHBOARD TAB 3 - DEMOGRAPHIC SURVEY

DISCUSSION

- Technology trends for now and future
- Solutions for increase of adaptability to changes
- Bridging the technology gaps within countries
- Lack of diversity within technology industry

OVERALL FINDINGS & IMPLICATIONS

Findings

- Fast changing in technology every year
- Technology is concentrated in developed countries than those in the developing countries
- There is a gap in technology workforce. Technology companies are predominantly white, male and young which limits the perspectives on the team and the industry as a whole.

Implications

- Companies need to increase investments in reskilling and upskilling programs for employees to adapt the trends.
- Update skill requirements for recruitment process.
- Invest in data analytics and machine learning to predict the trends.
- Tech recruiters need to expand their horizons to look to other pools that might be offering candidates of a different gender, ethnic background, or race to improve the tech diversity.
- Globalization of technology, technology transfers and learning to reduce the gaps between nations

CONCLUSION

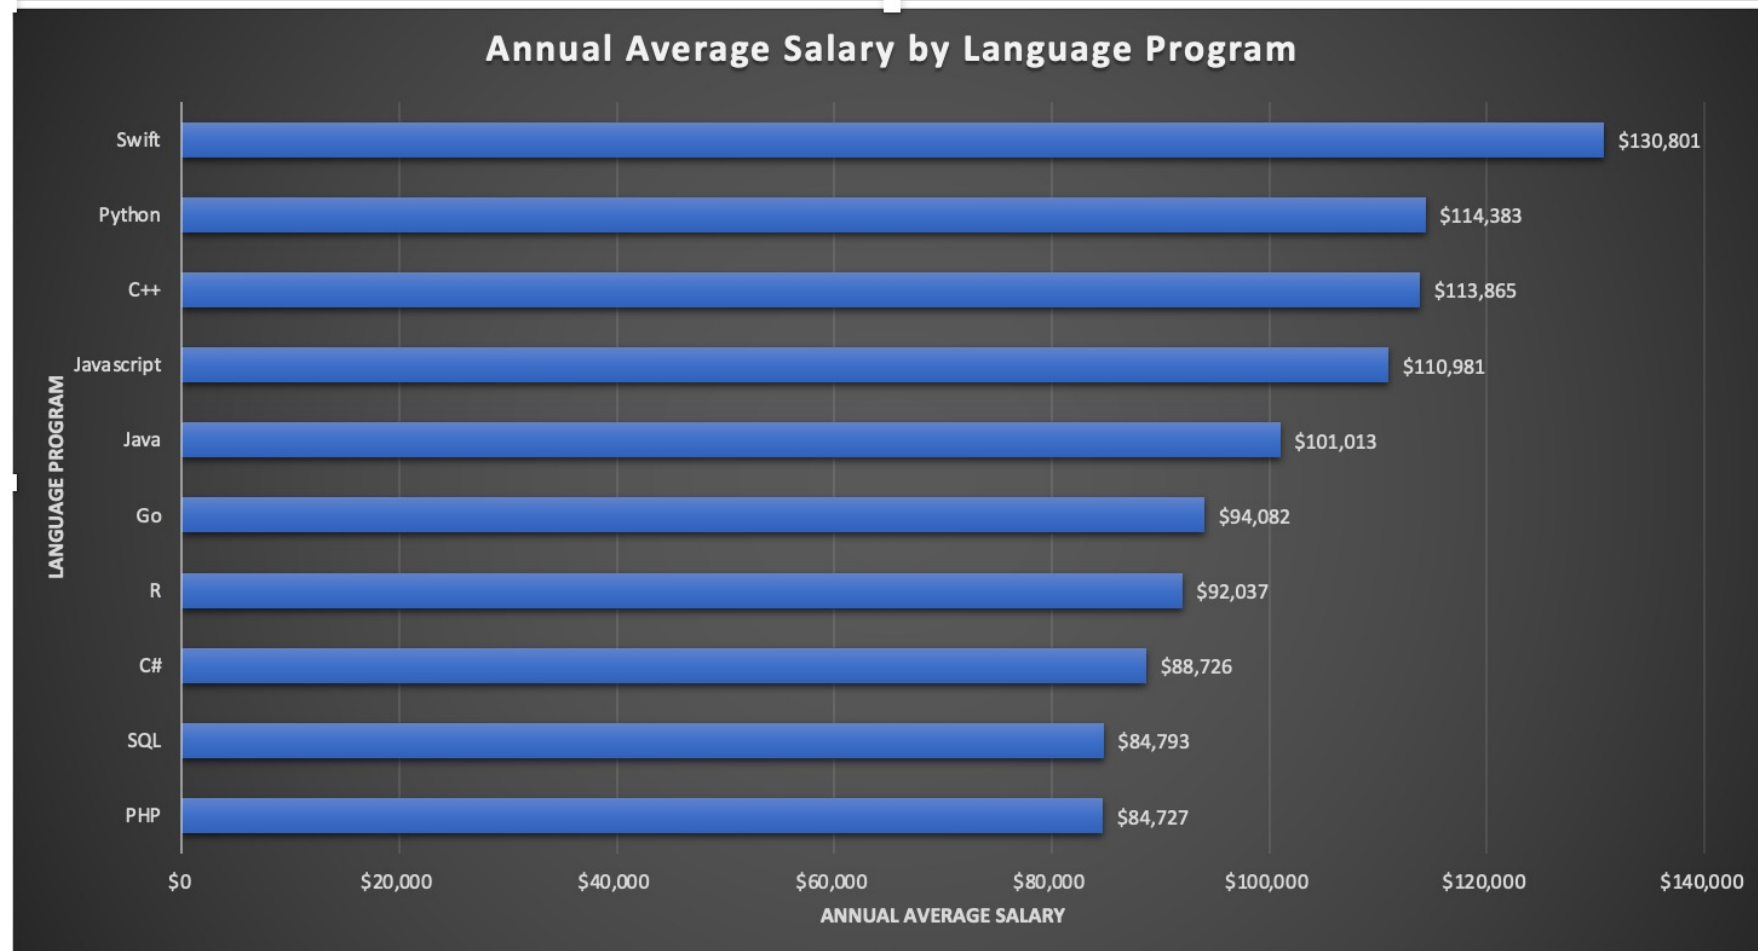

- Overview current technology demand
- Overview the trends in programming languages, databases, platforms and web frames to state that technology keeps changing every year.
- Overview demographic survey by gender, age, countries and education levels which significantly impacts to technology industry
- Solutions to be suggested to adapt the changes as well as reduce the demographic gaps in technology.
- In future, incorporate machine learning to predict the trends to increase adaptability to changes
